The Presidents Message

Hi Bromeliad Fans,

Colleen and I have been in the yard and shade house all weekend trying to get everything looking as good as possible while this wonderful weather is here. I did notice some cold weather damage to a few of our plants but over all they have done well.

We had a few people that came to the nursery last weekend for the workshop. My father (Bud Hendrix) shared his expertise to all that came. We all had a good time.

Our meeting this month is the last one before the show. Please bring any plants and questions you might have with you for our experts . Karen Andres will be doing the program on plant prep and grooming so come early for some fine tuning advice. We are striving to make this show and our society the best. To do this we need your participation so please enter at least one plant and help out. Clerking is a great way to learn and help our society. Talk to Pepe if you can find some time. See everyone at the meeting Monday night.

Tim

Billbergia nutons

Grown by Dr Jose Donayre'

Show & Tell Table

Bring a plant that you may enter in the show! It will give everyone a chance to see what the judges are looking for. Also, since Karen Andres will be doing the program, this will give her a chance to critique your plants. Please remember this is a great education for everyone, so don't be shy!!!

Also remember, if you need any plants identified this is the time to do it.....

DR Karl Green giving us a pop quiz "Name that Bromeliad" and Becky Blackwood wins Beautiful Watercolor from Jean Tease.....

Name Tag Winner
Molly Lesnik
Neo fireball X Neo cherry jubilee

Workshop at the Hendrix's - Getting tips from one of the experts.....

Reminders

March Birthdays bring goodies!

Happy Birthday to.....

Dr Jose Donayre'
Carol Vogt

Welcome All New Members

A big Thank You goes to.....

All who are participating in the show

And

To all those that have been helping clean up our meeting room

On the Cover.....

Billbergia grace goode

Grown by Tim Hendrix

A majority of the about 60 species of this genus are native to Brazil. Their entire distribution ranges from Mexico south to northern Argentina. They are predominantly epiphytes. Most species develop stunningly beautiful, large colorful inflorescences which are often pendulous, but are sometimes also erect. Unfortunately their blossoms are short lived.

Ie: Blooming Bromeliads, Baensch

Correction in February's Scurf... the name of the plant on the cover should have been..... Quesnelia marmorata variety Tim Plowman.
